

Strength in partnership

Calldene was formed in 2012, when two of Southern England's longest-established and leading timber engineering brands were brought together.

Dover Trussed Roof Company

Established in 1967 near Canterbury, Dover Truss is a leading, experienced manufacturer of trussed rafters and metal web joists.

Triad Timber Components

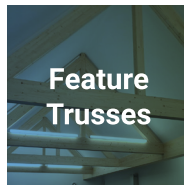

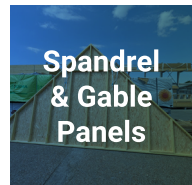

For over 50 years, Lancing-based Triad Timber has specialised in designing, producing, and supplying bespoke structural timber for residential and commercial projects.

Together, under the **Calldene Structural Timber Solutions** brand, these businesses combine extensive industry knowledge, skill, and expertise to provide a high-quality timber design and manufacturing service in the UK.

To discuss your next project with our design experts, **get in touch!**

What we offer

Calldene don't just manufacture timber products — they streamline your build process, reduce delays, and help you deliver projects on time and on budget.

Why builders choose Calldene

- One-stop partner for timber construction
- Fast, accurate quoting to keep projects moving
- Design support from experienced engineers
- Precision manufacturing
- Reliable lead times and coordinated deliveries
